Primary Care Physician – Internal and Family Medicine

Description

Thrive Comprehensive Medical Group is a multi-specialty group dedicated to alleviate patient suffering and burden of disease. We are looking for qualified Internal medicine or Family medicine providers to assist in providing comprehensive care for patients.

Responsibilities

- Respond to patients' medical issues by starting with their history
- Order radiology and laboratory tests and refer patients to specialists when necessary
- Analyze reports, examinations and test results to accurately diagnose patients, as well as present treatment options
- Discuss and explain treatments and medication thoroughly with patients, advising them of all the side effects and making sure that all allergy information is current before prescribing any medication or treatment
- Advise patients on lifestyle and diet changes that could help improve their health or treat the health problem they have
- Follow all departmental policies and procedures
- Keep up-to-date with medical procedures, developments, treatments and available medication
- Comply with federal and state privacy laws, always respecting a patient's confidentiality
